

NATURE IS OUR MODEL

Dr. Niels Benatar appraising the model NS 13/1 with Rudolf Galle from the SOMSO Development Department.

The surgical hand models NS 13/1 and NS 13/1-E were developed by SOMSO in close co-operation with Dr. Niels Benatar. Dr. Benatar has quietly introduced his anatomical knowledge from his extensive practical experience as hand surgeon in this model. This model offers a maximum in true-to-detail features for the training of hand surgeons. For explaining the situation for patients this dismantable hand model has exchangeable diseased and changed anatomical structures as a result of the frequently occurring diseases of the hand.

The wide opened Guyon's loge and hollow hand with N. ulnaris and A. ulnaris, which then form the superficial palmar arch.

SOMSO
MODELLE
SINCE 1876

The wide opened carpal tunnel with the greatly compressed N. medianus.

SOMSO - *a full five-year guarantee*

No other manufacturer in this field offers a full five-year warranty - on all models - that covers both durability and workmanship.

SOMSO Sun, *the symbol of quality*

SOMSO was founded in Sonneberg, Thuringia more than 130 years ago. Since then, SOMSO Modelle have proved to be the benchmark to which others aspire, recognised by the most discerning experts as the ultimate for teaching aids and scientific demonstration. For the Sommer family this is the motivation that drives them to contribute now, and in the future, to training and teaching in the service of science.

Hand assembly and finishing by German craftsmen

SOMSO Modelle are produced only in Sonneberg or Coburg - nowhere else - by highly qualified and skilled craftsmen. Some components are now machine-made, but all models are assembled and painted entirely by hand so that each is a unique work of art.

Each and every model

in the range demonstrates SOMSO's commitment to the highest standards of scientific accuracy and artistry. From concept through prototype to limited or series production, only specialist scientists, model makers and technicians are employed to produce the highest quality models, accurate down to the finest detail.

SOMSO MODELLE - subject to stringent quality controls

SOMSO's primary concern is for quality. Quality that passes the tests for scientific accuracy, paintwork, function, durability and materials. Genuine SOMSO Modelle reflect these quality criteria, and their base material is virtually unbreakable SOMSO-Plast.

SURGICAL HAND MODEL NS 13/1 AND NS 13/1-E

after Dr. Niels Benatar

SURGICAL HAND MODEL IN NATURAL SIZE, IN SOMSO-PLAST, IN 6 PARTS.

NS 13/1 · SURGICAL HAND MODEL

Natural size, in SOMSO-Plast and developed with Dr. Niels Benatar. The model is made up of 6 parts, which can be disassembled. Natural colours are used throughout allowing the muscles, tendons, blood vessels and nerves to appear as they would in a bloodless field during surgery. Interchangeable parts include typical pathological findings in carpal tunnel syndrome, trigger finger and Dupuytren's Disease. On a stand with base. Height: 33 cm., width: 18 cm., depth: 18 cm., Gewicht weight: 800 g.

NS 13/1-E · SURGICAL HAND MODEL

Natural size, in SOMSO-Plast and developed with Dr. Niels Benatar. With didactic painting. The model is made up of 6 parts, which can be disassembled. Natural colours are used throughout allowing the muscles, tendons, blood vessels and nerves to appear as they would in a bloodless field during surgery. Interchangeable parts include typical pathological findings in carpal tunnel syndrome, trigger finger and Dupuytren's Disease. On a stand with base. Height: 33 cm., width: 18 cm., depth: 18 cm., Gewicht weight: 800 g.
